How to Share Citations

How to Import Citations to other Bibliographies

Find the bibliography you want to share on your page, click **SHARE**

Fill in the Easybib email of your partner

Make sure you allow them to **Edit** if you want them to. If not, **View** will allow them to copy your citations.

Click **Share**
Your partner can now see the shared bibliography on his or her projects page.

To import your partner’s citations into your project, open up your partner’s Bibliography and check-mark or select the citations you want to import (or ALL), and choose Copy into another project.
Choose the project where you want to copy the citations.

Click **Duplicate**

The selected citations will now appear in the bibliography you chose (Robert’s Science Bibliography)
